

THE PROFITABLE TRADERS TRIANGLE

CORNER 1: SETUP SYSTEM

Before Every Trade, Check:

- ☐ **Weekly direction confirmed** (last candle = bias direction)
- ☐ **Trading during London or NY session only** (avoid dead hours)
- ☐ **Key bounce zone identified** in active session (30-min timeframe)
- ☐ **Entry confirmation signal present** (breakout/reversal/double bottom)

 **NEVER ENTER WITHOUT ALL 4 CHECKMARKS**

CORNER 2: RISK MANAGEMENT

Risk Size Decision:

- ☐ **Daily trend aligns with bias** = 3% risk ✓
- ☐ **Daily trend weak/sideways** = 2% risk ✓
- ☐ **15-min momentum fights bias** = Reduce risk by 1% ✓
- ☐ **Multiple conflicts** = Skip trade ✓

Quick Risk Formula:

Account Size × Risk % ÷ Stop Distance = Position Size

CORNER 3: TRADE MANAGEMENT

Before Entry:

- ☐ **Mark previous rejection zones** on chart
- ☐ **Set mental plan:** "I'll react, not predict"

During Trade:

- ☐ **Price breaks rejection cleanly** = Hold position
- ☐ **Price shows hesitation** = Consider partial exit
- ☐ **Always follow price action, never hope**

DAILY ROUTINE (60 Minutes Maximum)

1. Check weekly bias (2 minutes)
2. Wait for active session (London/NY)
3. Scan for setups using the Triangle checklist
4. Execute only perfect setups
5. Journal results

MARKET CONDITION MATRIX
